REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: applicant recites a guided vehicle system comprised of a roadway with a series of guidepath indicators. The vehicles follow the guidepath indicators along the roadway. The vehicles are equipped with front and rear steering assemblies. The vehicles are also equipped with sensing units for sensing and communicating with the guidepath indicators extending along the roadway. The sensing units communicate the location of the vehicle in relation to the guidepath indicators and steers the vehicle accordingly. The vehicles are further comprised of coupling assemblies at the front and rear of the vehicles. The vehicles are coupled together while both vehicles are traveling along the roadway.

The prior art made of reference, taken singularly or in combination, does not adequately disclose the features recited in the instant claims. Specifically, the prior art discloses sensors and guide means for the operation of the vehicle in relation with other vehicle. However, there is no mention of mechanical couplers on the front and rear of the vehicle and the vehicles disclosed in the prior art do not link together while in transit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
